EDUCATION

Binghamton University, Thomas J. Watson College of Engineering and Applied Science

Bachelor of Science in Computer Science

Expected Graduation: May 2028

Cumulative GPA: 3.68/4.00 | **Dean's List:** Fall 2024, Fall 2025

Relevant Coursework: Python OOP, Java OOP, C/Assembly Fundamentals, Professional Skills and Ethics, Computer Architecture

TECHNICAL SKILLS

- **Programming:** Python, Java, SQL, and C; Experience with Assembly and Machine Language
- **Security and Networking:** Network analysis, vulnerability scanning, Linux command-line workflows, log review, threat detection, and tools like Wireshark and tcpdump
- **Software & OS:** Eclipse, Visual Studio Code, Vim, Git, SQLite, Linux, Windows
- **Certifications:** Google Cybersecurity

PROFESSIONAL EXPERIENCE

Christian Cultural Center (CCC) – IT Intern | Brooklyn, NY

June 2026 – Present

- Audited existing SharePoint environment to identify outdated content and opportunities for improvement.
- Rebuilt and modernized the intranet to improve navigation and access to departmental resources.
- Created department pages, knowledge base resources, links, and site navigation using SharePoint Online.
- Collaborated with IT leadership to gather requirements and align the intranet with organizational needs.

PROJECT EXPERIENCE

Morse Code Encoder/Decoder

February 2026

- Developed a C program to encode and decode text to binary Morse code using bit-level operations.
- Implemented core functions for translating text to Morse and Morse back to text.
- Utilized bit manipulation and bit offset calculations to represent Morse code as a binary stream.

Log Analysis Project, Google Cybersecurity

January 2026

Tech Stack: Linux OS, SQL, Relational Databases

- Used SQL to analyze login attempt logs and employee data to detect unauthorized access and threats.
- Developed a strong understanding of security monitoring by examining logs and anomalies.
- Identified suspicious authentication patterns to support early detection of security incidents.
- Learned the importance of effective and direct queries for targeting specified information.

Linux Access Control & Permissions Hardening, Google Cybersecurity

December 2025

- Performed permission audits on files and directories to identify misconfigurations.
- Aligned file and directory permissions with organizational security policies to reduce unauthorized access.
- Secured archived and hidden files by removing unnecessary write permissions.

Incident Response & DDoS Attack Analysis, Google Cybersecurity

December 2025

- Analyzed a simulated DDoS attack caused by ICMP flooding that disrupted network services.
- Applied the NIST Cybersecurity Framework to assess and document the incident.
- Recommended mitigation strategies including firewall rate limiting and an IDS/IPS filter.
- Reduced network disruption by limiting ICMP traffic and applying filtering rules to maintain services.

Library Management System

November 2024 – December 2025

Tech Stack: Java, OOP, Java Collections Framework

- Designed and implemented a console-based Library Management System in Java.
- Enforced rules such as unique member IDs, single-copy borrowing, and real-time updates.
- Implemented input validation and error handling to ensure reliable user interaction and prevent invalid inputs.
- Used HashSet and ArrayList data structures to manage book collections efficiently.

ACTIVITIES & WORK EXPERIENCE

Pi Kappa Alpha, Mu Gamma Chapter – Recruitment Cabinet

September 2024 – Present

- Supported recruitment by engaging prospects and representing chapter values like scholarship and leadership.
- Contributed to community service through American Legion and assisted members in aiding charitable causes.

Branchinelli's Pizza and Restaurant – Counter Staff | Hauppauge, NY

April 2022 – Present

- Provide counter service and manage phone orders to ensure a positive customer experience.
- Handle high-volume order flow efficiently and support takeout preparation.
- Work with team members in a fast-paced environment to ensure order fulfillment.
